

SUPERFISHXL

The Super Fish XL in X-2 Epoxy are the board if you are looking for a more durable version of this amazing board. The Super Fish in X-2 construction blends the same high performance surfing and wave catching ability as the Super Fish but with a durability that polyester can't match.

If you are heavy footed or tend to put a few extra knee and elbow dings in your board you will want to check the epoxy version out.

The X-2 is also perfect for surfers that log a lot of airline miles and want to make sure their board gets to it's destination in one piece.

Single Concave

Step Rail

2-6ft Waves
