

FUNBOARDS

The NSP 6'8" is the most popular board in the funboard NSP series. This is a forgiving performance fun shape that will offer a stable platform for beginning surfers as well as a rounded pintail that will hold in overhead surf for expert surfers too. With this shape you have all your bases covered.

The 7'2" Funshape is performance version of the 7'6 with a little more flip in the nose to assist with late take off's. This performer has a beautifully proportioned template that is both stable and responsive in a variety of surf. The 7'2 is narrow enough to fit under your arm and buoyant enough to be an easy paddler that will get you into waves all day long!

LENGTH	WIDTH	THICK	VOLUME	FINS	APPROX WEIGHT RANGE
6'8"	21"	2 7/8"	45 ltr	FCS M7	0-143lbs (0-65kg)
7'2"	21"	2 3/4"	46 ltr	FCS M7	0-143lbs (0-65kg)

FUNBOARDS

The 7'6" Tri fin egg is a classic. It's shaped like a mini longboard and the focus here is fun. This is a perfect first board for young surfers and for mini longboard fanatics alike. The egg shape is small enough to carry around but very stable on the water. This board will grow with your ability from your first wave to your first cutback.

The 7'10" Mini longboard is a performance shape in a funboard package. It is a balanced stable shape combined with the extra volume that helps you catch waves with ease. But don't be fooled, this board goes like a rocket when the surf is pumping. The rounded pintail will hold solid surf and the thruster configuration combined with the nicely foiled rails really projects your bottom turn. This is a board the entire family can enjoy.
