

# LONGBOARDS

The 8'2" Mini features a relaxed and neutral rocker profile that is fun but responsive while being easy to ride. The rounded square tail/thrustrer fin configuration is responsive and drives nicely off the bottom.

The 8'6" has a perfectly proportioned foil, template and concave make this board a blast to ride and for many surfers their only board for good reason.

The 9'2" is your perfect longboard for anyone who want a fun board that will last the tests of time. It's a classic shape that works well across the board. You can't go wrong with this model.

The 10'2 is getting into some serious noseriding territory. The nose entry, tail rocker and single fin configuration make this board a very stable platform for practicing your cross stepping and hanging ten!

The 11'0 NSP single fin is all glide. There is not a summers day where you won't have a blast on this board. 25 3/4" wide and over 4 inches thick, this board will even support fun tandem surfing and kids trying SUP.
