

TOURING SUP

The new NSP Touring SUP is designed for multiuse distance, downwind and flat water paddling. The stability and displacement of this hull make it ideal as the go to recreational distance board.

Both boards are equally durable and light with NSP's quality E2 Epoxy construction that is built to last. The result is a light and strong paddleboard that is compatible with all skill levels. It is also fast enough to win races but easygoing and stable enough to cruise along the coast for physical training or sightseeing. It features a balanced handle so you can carry it around with ease.

The Touring is ideal for Stand Up Paddlers looking to cover long distances in a short amount of time.

Intergrated full length deck traction included.

Flat Bottom

Boxy Rail

0-4ft Waves

All Skill Levels

LENGTH	WIDTH	THICK	VOLUME	FINS	APPROX WEIGHT RANGE
